

Yanmar Genuine greases offer a superior lubrication and protection to our applications.

**All greases are EP-2.
Containers size: 400gr**

**Application:
Yanmar pleasure craft engines
Yanmar gearboxes & sterndrives**

LITHIUM COMPLEX MULTI-PURPOSE GREASE

Parts code:
GREASE-COMPLEX

Yanmar Grease is specially designed for lubrication of mechanism and bearings submitted to heavy load, operating under medium and high speed in a wide temperature range. It can be used in high temperatures without the loss of the physic and chemical properties.

LITHIUM CALCIUM GREASE

Parts code:
GREASE-CALCIUM

Yanmar Lithium Calcium Grease offers optimum shear stability, low oil separation and good rust and oxidation inhibiting properties. It has a smooth texture and dropping point above 180C. This product exhibits excellent film forming characteristics.

LITHIUM PTFE GREASE

Parts code:
GREASE-TEFLON

Yanmar Genuine Lithium PTFE Grease provides a strong protection against rust and water with high wear resistance. Highly recommended for drive shaft splines, ball and roller bearings. It is mixable with other lithium greases.

Apply on:

- **Engine damper disk spline**
- **Gearbox input shaft**
- **Drive unit pilot**
- **Drive shaft splines**
- **Propeller shaft splines**
- **Steering cable end**
- **Power steering bushines**
- **Upper & lower pivot bolts**
- **Bell housing studs**
- **O-ring seals**
- **Anchor pin threads**
- **Shift cable**
